

PhycoTerra®

ALFALFA AND GRASS HAY

HOW ALFALFA AND GRASS HAY GROWERS CAN BENEFIT FROM FEEDING SOIL MICROBES

Healthy soil is vital to grow healthy crops of Alfalfa and Hay Grass.

PhycoTerra® soil microbe food invigorates growth of beneficial soil microbes required for optimum soil health.

The vital interaction between beneficial soil microbes and the nutrients available in soil increases the availability of nutrients for crops.

Watch plants respond with improved crop establishment, greater crop uniformity, improved resiliency under stress situations, improved crop quality and yield.

PHYCOTERRA® APPLICATION RECOMMENDATIONS

Apply PhycoTerra® within or near the root zone at planting or prior to planting to maximize crop benefit.

PhycoTerra® can be tank mixed with standard fertilizers or crop protection products.

It's always best to conduct a jar test with all your tank mix ingredients prior to mixing an entire load.

Shake containers and mix totes well prior to use. In finished tank solutions, maintain constant hydraulic or paddle agitation.

RECOMMENDED APPLICATIONS

Alfalfa and grass hay: includes alfalfa, timothy grass, bermuda grass, clover, vetch and others

- Pre-plant application: Broadcast apply at 1-2 quarts per acre
- After each cutting: Broadcast apply at 1-2 quarts per acre throughout the season
