

PhycoTerra®

BLUEBERRY/ CANE BERRIES

HOW BLUEBERRY/CANE BERRY GROWERS
CAN BENEFIT FROM FEEDING SOIL MICROBES

Healthy soil is vital to grow a healthy crop of blueberry and cane berries.

PhycoTerra® soil microbe food invigorates growth of beneficial soil microbes required for optimum soil health.

The vital interaction between beneficial soil microbes and the nutrients available in soil increases the availability of nutrients for crops.

Watch plants respond with improved crop establishment, greater crop uniformity, improved resiliency under stress situations, improved crop quality and yield.

BLUEBERRY/CANE BERRY PHYCOTERRA® RECOMMENDATION

Apply PhycoTerra® within or near the root zone at planting to maximize the benefit for the crop.

PhycoTerra® can be tank mixed with standard fertilizers or crop protection products.

It's always best to conduct a jar test with all your tank mix ingredients prior to mixing an entire load.

Shake containers and mix totes well prior to use. In finished tank solutions, maintain, constant hydraulic or paddle agitation.

APPLICATION RATES & TIMINGS

Post-Pruning Application:
2-3 qts/acre by drip fertigation every two weeks for a total of 4 applications
