

## BRASSICAS

### HOW BRASSICA GROWERS CAN BENEFIT FROM FEEDING SOIL MICROBES

#### BROCCOLI & CAULIFLOWER PHYCOTERRA® APPLICATION RECOMMENDATION

Brassicas to include: broccoli, brussel sprouts, cabbage, cauliflower, and others.

Apply PhycoTerra® within or near the root zone at planting to maximize the benefit for the crop.

PhycoTerra® can be tank mixed with standard fertilizers or crop protection products.

It's always best to conduct a jar test with all your tank mix ingredients prior to mixing an entire load.

Shake containers and mix totes well prior to use. In finished tank solutions, maintain constant hydraulic or paddle agitation.

#### APPLICATION RATES & TIMINGS

- Apply with any liquid nitrogen fertilizers including CAN17 or CN9
- Direct seed at planting: 1-2 quart per acre in 5-10 gallons of solution
- Transplant at planting: 2 quarts per acre in 10-20 gallons of solution
- Side-Dress at 5-6 leaf stage: 1-2 quarts per acre

AGRICULTURE

Healthy soil is vital to grow a healthy crop of brassicas.

PhycoTerra® soil microbe food invigorates growth of beneficial soil microbes required for optimum soil health.

The vital interaction between beneficial soil microbes and the nutrients available in soil increases the availability of nutrients for crops.

Watch plants respond with improved crop establishment, greater crop uniformity, improved resiliency under stress situations, improved crop quality and yield.
