

## COTTON

### HOW COTTON GROWERS CAN BENEFIT FROM FEEDING SOIL MICROBES

#### PHYCOTERRA® APPLICATION RECOMMENDATIONS

Apply PhycoTerra® within or near the root zone at planting or prior to planting to maximize crop benefit.

PhycoTerra® can be tank mixed with standard fertilizers or crop protection products.

It's always best to conduct a jar test with all your tank mix ingredients prior to mixing an entire load.

Shake containers and mix totes well prior to use. In finished tank solutions, maintain constant hydraulic or paddle agitation.

#### RECOMMENDED APPLICATIONS

- At Planting: Apply at 1qt/acre in-furrow or 2 x 2 with fertilizers
- Side Dress Application: 1qt/acre at first pin-head square

AGRICULTURE

Healthy soil is vital to grow a healthy crop of cotton.

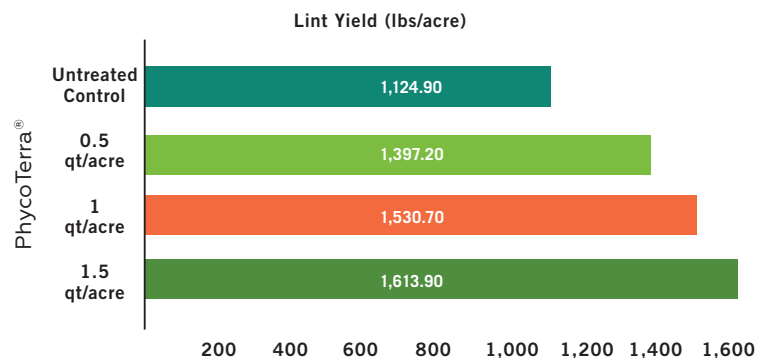

PhycoTerra® soil microbe food invigorates growth of beneficial soil microbes required for optimum soil health.

The vital interaction between beneficial soil microbes and the nutrients available in soil increases the availability of nutrients for crops.

Watch plants respond with improved crop establishment, greater crop uniformity, improved resiliency under stress situations, improved crop quality and yield.

#### PHYCOTERRA® DELIVERS

Safford, AZ - Pima Cotton  
1 time application in seed furrow

Somerville, TN - Upland Cotton  
1 time application in seed furrow improved yield by 12%

PhycoTerra® applied once in furrow at 1qt/acre
