

FLORIDA CITRUS

HOW CITRUS GROWERS CAN BENEFIT FROM FEEDING SOIL MICROBES

Healthy soil is vital to grow a healthy crop of citrus.

PhycoTerra® soil microbe food invigorates growth of beneficial soil microbes required for optimum soil health.

The vital interaction between beneficial soil microbes and the nutrients available in soil increases the availability of nutrients for crops.

Watch plants respond with improved crop establishment, greater crop uniformity, improved resiliency under stress situations, improved crop quality and yield.

CITRUS PHYCOTERRA® RECOMMENDATION

Apply PhycoTerra® within or near the root zone at planting to maximize the benefit for the crop.

PhycoTerra® can be tank mixed with standard fertilizers or crop protection products.

It's always best to conduct a jar test with all your tank mix ingredients prior to mixing an entire load.

Shake containers and mix totes well prior to use. In finished tank solutions, maintain constant hydraulic or paddle agitation.

APPLICATION RATES & TIMINGS

- Post-Harvest Vegetative: 3 qts/acre by drip or micro-sprinkler fertigation
- Full Bloom: 3 qts/acre by drip or micro-sprinkler fertigation
- Monthly applications: 2 qts/acre by drip or micro-sprinkler fertigation until 30 days prior to expected harvest
