

PhycoTerra®

PEACHES AND NECTARINES

HOW PEACH AND NECTARINE GROWERS CAN BENEFIT FROM FEEDING SOIL MICROBES

Healthy soil is vital to grow a healthy crop of peaches and nectarines.

PhycoTerra® soil microbe food invigorates growth of beneficial soil microbes required for optimum soil health.

The vital interaction between beneficial soil microbes and the nutrients available in soil increases the availability of nutrients for crops.

Watch plants respond with improved crop establishment, greater crop uniformity, improved resiliency under stress situations, improved crop quality and yield.

PHYCOTERRA® RECOMMENDATION FOR PEACHES AND NECTARINES

Apply PhycoTerra® within or near the root zone at planting to maximize the benefit for the crop.

PhycoTerra® can be tank mixed with standard fertilizers or crop protection products.

It's always best to conduct a jar test with all your tank mix ingredients prior to mixing an entire load.

Shake containers and mix totes well prior to use. In finished tank solutions, maintain constant hydraulic or paddle agitation.

APPLICATION RATES & TIMINGS

- Post-Harvest Root Flush: 3 qts/acre by drip or micro-sprinkler fertigation
- Full Bloom: 3 qts/acre by drip or micro-sprinkler fertigation
- 30 days post bloom: 3 qts/acre by drip or micro-sprinkler fertigation monthly for two additional applications

PhycoTerra® is compatible with CAN17. We highly recommend the application PhycoTerra® whenever CAN17 is used.
