

SWEET CORN

SWEET CORN GROWERS CAN BENEFIT FROM FEEDING SOIL MICROBES

Healthy soil is vital to grow a healthy crop of sweet corn.

PhycoTerra® soil microbe food invigorates growth of beneficial soil microbes required for optimum soil health.

The vital interaction between beneficial soil microbes and the nutrients available in soil increases the availability of nutrients for crops.

Watch plants respond with improved crop establishment, greater crop uniformity, improved resiliency under stress situations, improved crop quality and yield.

PHYCOTERRA® APPLICATION RECOMMENDATIONS

Apply PhycoTerra® within or near the root zone at planting or prior to planting to maximize crop benefit.

PhycoTerra® can be tank mixed with standard fertilizers or crop protection products.

It's always best to conduct a jar test with all your tank mix ingredients prior to mixing an entire load.

Shake containers and mix totes well prior to use. In finished tank solutions, maintain constant hydraulic or paddle agitation.

RECOMMENDED APPLICATIONS

- At Planting: Apply at 1 - 2 qts/acre in-furrow or 2 x 2 with fertilizers
- At V6 - V8 Stage: Apply at 1 - 2 qts/acre with UAN fertilizers by side-dress or drip fertigation
